

COOLING EQUIPMENT

GENERAL COOLERS

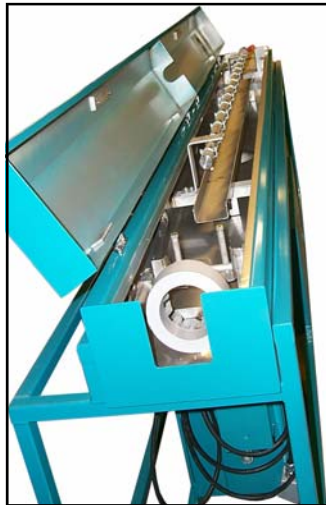

20' Cooling Tank with spray headers.
Air operated lids.
Double wall stainless and insulated.

Water filtration for particulate removal.
Plate style heat exchanger for efficient heat transfer.
Pumping reservoir with over flow and level controls.

Two drum cooling unit with AC drive.
Air clutch control of drum rotation for threading.
Reservoir with water recirculation.
Controlled water fill with overflow for temperature control.
Remote operator porch for easy access.
Fully guarded and interlocked for operator safety.

10' stainless flood-style cooling tank.
High efficiency blow-off ring for water removal.
Pumping reservoir with filter and level controls.
Tube and shell heat exchanger.

COOLING EQUIPMENT FEATURES

- Small two-drum cooling unit for lab line.
- Variable speed drive, dancer controlled.
- Air knife blow-off.

- 10' spray cooling with exhaust system.
- Air operated lids.
- Water circulation with secondary vibratory filtration for flock removal.
- Auto level controls with overflow and drain.

- Vacuum Calibration tank.
- Stainless tank with water flooding of product.
- Stationary calibration dies.
- Vacuum pump with control for calibration dies.
- Water feed to calibration dies with zone control.
- Water blow-off flexible nozzles.

- Multi-zone cooling with independent zone control for precise temperature control of product.
- Filtered water to reduce nozzle plugging.
- Stainless steel tank and frame.
